

# Perforators

**Mark 1 to 25 sheets in  
a single step!**

## The Best Way to Mark Documents

Using a Cummins Perforator is the fastest, most productive way to mark documents clearly and permanently. A single actuation marks one to 25 sheets with letters and numbers formed by small holes or perforations. These easy-to-read markings can't smudge or obliterate existing printing. And, they cannot be erased or removed.

## Fast, Efficient and Productive

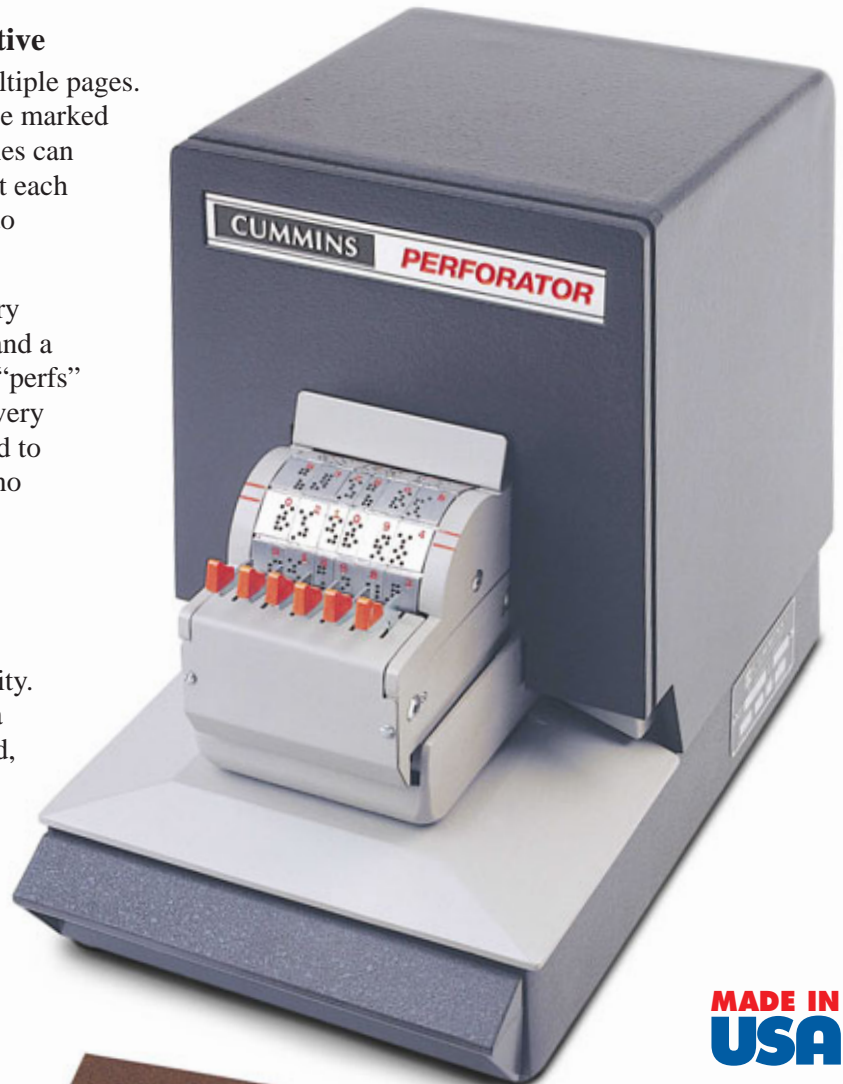

It's the fastest way to mark multiple pages. Thousands of documents can be marked per hour. Variable dates and lines can be set in seconds. Simply insert each set of documents into the unit to instantly actuate.

Multiple pages in a set may vary in size, shape and thickness—and a single actuation automatically “perfs” the same inscription through every page without skipping. No need to remove staples. And there are no ribbons or messy ink!

## Typical Applications

Recommended by auditors, Perforators assure greater control, security and productivity. “Perfing” permanently marks a document's “history”—received, keyed, entered, canceled, paid, etc.

Widely used for invoice canceling, mail dating, x-ray and film marking, source document marking, process dating, document dating, validation and cancelation – plus many other valuable uses.

**MADE IN  
USA**

Perforators are available with one, two or three-line "inscription". The optional top and bottom lines are factory-set. The center line is operator controlled.

SPECIAL

Top line (optional) is factory-set.

Middle line is operator controlled. Models available for numbers, for dates and numbers.

YOUR CO.

Bottom line (optional) is factory-set.

Actual size replica of extra wide inscription.

## Cummins Perforators are used in a wide variety of applications...

### Canceling

Recommended by auditors, a perforator helps insure that invoices won't be paid a second time. All supporting documents are clearly and permanently marked, forever.

- Invoices
- Purchase Orders
- Bills of Lading
- Checks
- Stock Certificates
- Insurance & Other Claims

### Dating

Marking incoming mail with the proper date has always been a challenge for companies of all sizes. A Cummins Perforator quickly dates incoming mail with the date and optional wording.

- Insurance Claims
- Radiographs (x-rays)
- Legal Documents
- General Mail

### Numbering

There are many applications where a number must be assigned to a document. Cummins Perforators can mark a batch number, consecutive number or random number to a variety of documents.

- Inventory Tags
- Purchase Orders
- Legal Documents
- Contracts
- Passports
- Labels

### Radiograph (X-Ray) Marking

The one way to permanently and clearly identify radiographs without damaging the image area is with a Cummins Perforator. The date department and patient ID can be marked on the edge of the radiograph so as to not block the image.

### Validating

Government agencies, colleges and other companies have been using Cummins Perforators for a variety of validating functions, including:

- Licenses
- Certificates
- Passports
- Transcripts

### Process Marking

The workflow of paper processing continues. Properly marking these documents will help insure they are not processed a second or third time. Any document requiring processing and returned to file can be quickly and clearly marked to prevent reoccurring processing.

- "Keyed" Documents
- File Copies
- Insurance Forms
- Legal Documents
